GUARDSPRO
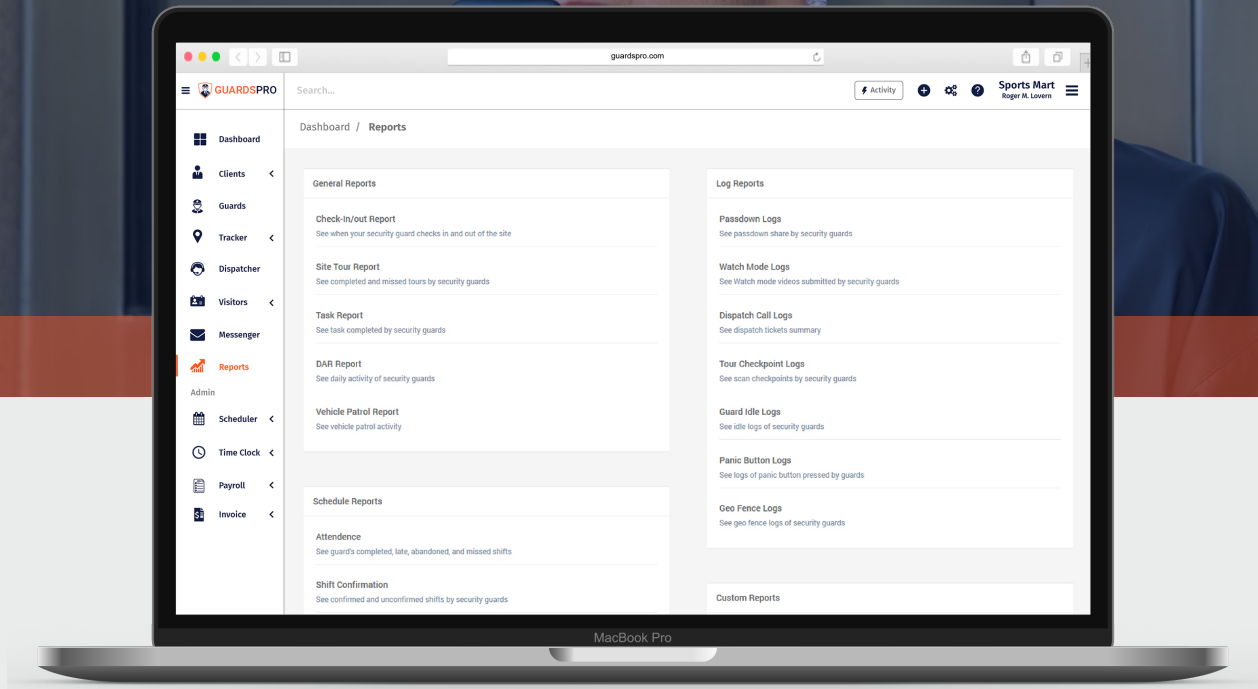

GuardsPro's Functional And Reliable Guard Tour Reporting Software

Explore The Features Of Best Real-Time Security Reporting Software

Daily Activity Reports

Daily Activity Report is one of the primary reports that plays a crucial role in providing day-to-day updates to clients. Equip your guards with a mobile app to ensure they can share it with them live.

Incident Reporting

With GuardsPro's incident reporting feature, receive complete and accurate incident reports as incidents happen on-site to make informed & strategic decisions to keep client's property safe.

Check-In/Out Report

With GuardsPro check-in/out report it is easy to find out whenyour security guards check-in and out of the site. Find the exact piece of data by applying multiple filters based on client, client sites, and guards.

Custom Reports

With GuardsPro custom reports the admin defines criteria for the reports, making sure that the guards submit only necessary and relevant data from the post site tailored to the client's needs.

GUARDSPRO

Do more than creating reports with GuardsPro's Reporting Module. Now receive, access, approve, and share accurate reports in real-time.

Drive productivity and profitability with effectual reports that are concise, come in timely, and are supported by relevant logical data. Empowers guards to submit reports from the site using the mobile app.

Task Reports
01

Find out when your security guards complete their assigned tasks, receiving detailed task reports with the list of tasks that were 100% completed on client sites.

Hourly Report
02

The guards can update reports every hour right from their smartphones, cutting down reporting time and making it easier to submit and access reports.

Site Tour Report
03

Access the site tour reports for all guards for multiple sites. Keep an account of performance and on-site incidents with images and videos.

Watch Mode Log
04

Easily view video feeds shared by your guards in watch mode using the GuardsPro app. Use advanced filters to locate watch mode feeds based on post sites.

Passdown Log
05

Quickly access the passdown logs as they are created by your security officers. Find out detailed information about individual passdown entries.

Dispatch Log
06

Allow dispatchers to efficiently manage, update, and access the dispatch calls received from different sites and assign them to the closest guard for quick response.
