# GUARDSPRO

The Ultra Modern Visitor Management System.

Streamlines Security With A Modern Twist.

Say goodbye to manual, paper-based systems with virtual registration for on-site visitors and vehicles.

The Pragmatic Visitor Management Software

GuardsPro's pragmatic visitor management software allows security guards to effortlessly create legible and detailed logs and profiles of visitors and vehicles for quicker check in/out. Thus, it helps cut down time and effort consumed in manual processes.

GUARDSPRO

Sophisticated Visitor Management System

The First Step In Line Of Defence To Minimize Security Breaches.

One Device Revolutionary System

A smartphone with GuardsPro mobile patrol app is all you need to get the work done.

Organized Virtual Visit Log

Chronologically keeps track of who visits the post site and when to be shared with the clients.

Cost-Effective Way To Document

Eliminate the need to maintain multiple logbooks saving on documentation expenses.

Uncompromisable Database

Registered information can't be accessed, duplicated, or compromised by unauthorized personnel.

Progressively Time-Efficient

Spare the visitors and the guards of the lengthy sign in/out process to save both time & money.

Streamline Visitor Experience

Check in the returning visitors by adding them to a visitor log rather than creating a visitor profile all over again.
